We Manufacture a diverse product range that includes General & B-Lactam tablets, Capsules, Liquid orals, Injections, Dry syrups, Dry powder for injections, Surgical Products, Lozenges, Nasal drops, Eye & Ear preparations, Creams, Ointments, and medical devices for the global market.

We as a company are well known in the market for producing high-quality products that meet WHO-GMP accreditations.

**“Choice and trust of people will always be prioritized”.**

### VISION:

We envision a world where everyone has access to affordable and effective medicines that improve their health and well-being. We strive to be a leader in innovation, research, and development of new treatments and therapies that address unmet medical needs.

### MISSION:

Our mission as a pharmaceutical company is to improve the health and well-being of people around the world through the development and delivery of innovative, safe, and effective medications.

### QUALITY:

We provide the best pharmaceutical-formulated products to our beloved clients. Our products are manufactured under strict international quality supervision in our WHO-GMP-approved plants, and at all stages of manufacturing.

## MANUFACTURING UNITS:

ANH Pharmaceuticals is a leading pharmaceutical company having state-of-the-art manufacturing facilities. Our company is committed to manufacturing and delivering high-quality medicines that improve the quality of life of people all around the globe. We have Five WHO-GMP-certified manufacturing Units specializing in -

- PLANT 1: General Tablets, Capsules, Creams and Ointments.
- PLANT 2: Tablets, Capsules, Syrups.
- PLANT 3: Beta-Lactam – Tablets, Capsules.
- PLANT 4: Injectables.
- PLANT 5: Syrups and Suspensions.

### Quality Assurance and Control:

We ensure that our customers always receive high-quality products at all times meeting the world standards manufactured in WHO-GMP approved plants. To preserve reliable values of quality across all our manufacturing units, we have implemented Quality Assurance (QA) systems that regulate and streamline GMP processes.

These include Quality Management Systems (QMS), Corrective and Preventative Action (CAPA), change control, complaint management, and deviation management, which are scrutinized and accepted by regulatory authorities all across the globe.

Our Quality Control (QC) function observes the guidelines established by QA and employs Batch Manufacturing Records (BMR), and Goods laboratory practices (GLP) to ensure comprehensive control throughout the organization.
